RITMICA®
ALUMINIUM

Ritmica is a family of partition walls that has a separating function, supplied in **four versions** that vary in the number or type of glass and solid panels.

RITMICA® D1
central glass

RITMICA® DA
asymmetrical glass

RITMICA® D2
double glass

RITMICA® SOLID
double solid partition

CHARACTERISTICS

- 01.** Thickness: 70 mm
- 02.** Floor and ceiling rails, corner profiles and wall-end uprights are in 6060 UNI 9006/1 extruded aluminium
- 03.** 3 versions of glazed partitions - single central glass, asymmetric glass and double glass
- 04.** 1 solid version with double melamine-finished panels, 18 mm thick
- 05.** 2 thicknesses can be used for safety-glass or acoustic modules
- 06.** Fixed corner profiles
- 07.** Vertical junctions between glazed elements, made of aluminium, polycarbonate or transparent two-sided tape
- 08.** Utility module
- 09.** 9 versions of hinged doors - solid, tempered glass and framed
- 10.** 5 versions of external sliding doors - solid, tempered glass and framed

RITMICA® D1

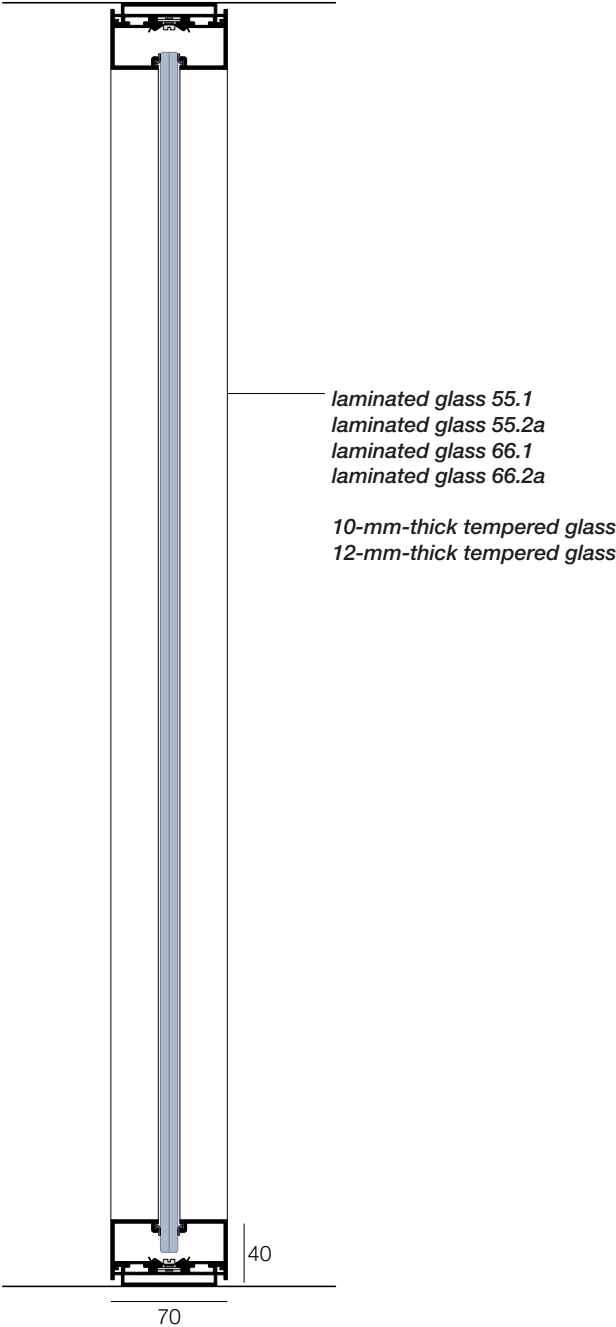

- 01.** Thickness: 70 mm
- 02.** Floor and ceiling rails, corner profiles and wall-end uprights are in 6060 UNI 9006/1 extruded aluminium
- 03.** Single central glass - 55.1/55.2a/66.1/66.2a laminated glass or 10-12-mm-thick tempered glass
- 04.** Fixed corner profiles
- 05.** Vertical junctions between glazed elements, made of aluminium, polycarbonate or transparent two-sided tape
- 06.** Utility module
- 07.** 9 versions of hinged doors - solid, tempered glass and framed
- 08.** 5 versions of external sliding doors - solid, tempered glass and framed

- 01.** Laminated glass 55.1 - **34 dB**
- 02.** Laminated glass 55.2 + acoustic film - **36 dB**
- 03.** Laminated glass 66.1 - **36 dB**
- 04.** Laminated glass 66.2 + acoustic film- **38 dB**

RITMICA®
ALUMINIUM

Technical specifications

Technical specifications

RITMICA® ALUMINIUM is a family of **70-mm-thick** partition walls that has a separating function, supplied **in four versions** that vary in the number or type of glass and solid panels.

VERSIONS

RITMICA® D1

Rectangular-section guide profile for single glass, thickness: 55.1 - 55.2a - 66.1 - 66.2a - 10 mm - 12 mm

RITMICA® DA

Rectangular-section guide profile for single asymmetric glass, thickness: 55.1 - 55.2a - 66.1 - 66.2a - 10 mm - 12 mm

RITMICA® D2

Rectangular-section guide profile for double glass, thickness: 55.1 - 55.2a - 66.1 - 66.2a - 10 mm - 12 mm

RITMICA® SOLID

Rectangular-section guide with double 18-mm-thick particle-board solid panels

GENERAL DESCRIPTION

The wall, that has a total thickness of 70 mm, is made of an **extruded aluminium alloy 6060 UNI 9006/1** structure (floor and ceiling rails, uprights, wall-end uprights) designed to accommodate safety-glass closing panels and solid panels or other monolithic materials as requested by the customer.

The floor and ceiling **rails** and wall profiles allow for perfect levelling of the wall both horizontally and vertically, as well as excellent sealing against existing walls.

The perfect **junction** between guide profiles, in two- or three-way versions, is ensured by aluminium corner elements, mechanically anchored.

The system is equipped with fixed **corner profiles**, and aluminium **intermediate** profiles whose function is to increase the mechanical resistance of the panels at the junctions and improve their closure.

Two-way and three-way polycarbonate **linear connection** elements are added to these junctions.

The two options of glass thicknesses allow different levels of noise reduction, to meet project-specific requirements.

Technical specifications

The solid version is made of melamine-finished 18-mm-thick panels with an insulating core that provides excellent sound absorption.

Doors can be either hinged or sliding (external), and can be supplied at both wall height or standard height. Both types of doors can be single-leaf or double-leaf.

Hinged doors can be made of wood, framed single glass or double glass, or glass only; the framed version allows for the installation of recessed overhead door closers and lower acoustic dust seals; on the glazed version only an external door closer can be installed.

The **sliding version** can be made of wood, single framed glass or flush glass. Correct sliding is ensured by soft-stop mechanisms for closing and opening the doors.

The 43-mm-thick **honeycomb-core wood door** has an internal honeycomb structure inserted in a firwood perimeter frame and fibreboard panels on both sides, finished with HPL laminate edged and ABS edges. Thickness=10/10 mm.

The **framed glass door** has perimeter extruded profiles in 6060 UNI 9006/1 aluminium alloy, of different width, and an internal tempered or laminated glass (3+3 mm), clear or frosted.

Wooden or framed-glass doors are supplied with different types of hinges: external pivot hinges with 180° opening; hinges concealed in the frame, hinges adjustable on three axes, with 180° opening.

The **glass door** is made with a 10-mm-thick tempered glass panel, with clear or frosted finish.

The hinges provided for flush doors can be: in die-cast aluminium, with 110° or 180° opening; aluminium or steel pivot hinges, with 180° opening; aluminium or steel linear hinges, with 180° opening.

Door frames are made of extruded aluminium telescopic profiles. For dimensional and resistance reasons they cannot receive switches or sockets. To allow for adequate **cable management** inside the wall, a **utility module** is provided to facilitate the installation of switches, sockets, thermostats, alarm sensors and other dimensionally compatible equipment.

Doors can be matched to a **wide range of standard handles** that can be further expanded thanks to the use of locks with a universal plate, suitable for the installation of out-of-catalogue items.

These walls can be perfectly **integrated** with the Quadra storage system.
